PROFILE

Product designer and Harvard Master in Design Engineering candidate with experience designing AI image and video tools. Background in architecture, including physical prototyping and user testing with medical staff.

EXPERIENCE

OpusClip — Product Design Intern
Remote · June–August 2026

- Designed AI Producer's custom-template setup flow and created 30+ reusable B-roll templates. Reported project results included approximately 15 minutes less setup and editing time per video.
- Designed controls for reviewing and replacing individual AI-generated effects. Swap shipped; the project reported a 30% reduction in repetitive editing. Custom-template creation remained in development.

cre[ai]tion — Product Design Intern
Suzhou, China · May–July 2026

- Designed image-editing, video-editing, image-to-3D and reusable-workflow features within the connected AI workspace. The team shipped all four features; evaluation with 40 beta testers reported a 25% increase in task completion.
- Designed reusable workflows that let designers save a sequence and rerun it with new inputs, with a reported 50% reduction in repeat setup time.

NBBJ — Designer
Los Angeles, CA · October 2024–April 2026

- Led 50+ prototyping and user-testing sessions with 40+ medical staff for Cedars-Sinai hospital work, using clinician feedback to revise room layouts and bedside workflows.
- Coordinated design work for Hana Financial Group's headquarters, integrating technical, regulatory and workplace requirements with the project team.

SVA Architects — Architectural Job Captain
Santa Ana, CA · October 2023–September 2024

- Led accessibility and universal-design work across 30+ affordable housing, civic and mixed-use projects, including the 570-unit Chula Vista E Street TOD and Murrieta Public Library Expansion.

EDUCATION

Harvard University
Master in Design Engineering · Expected 2028
Cambridge, MA · 2026–2028

- Joint program of the Graduate School of Design and the School of Engineering and Applied Sciences
- Coursework: Data Science; Tangible Interfaces, MIT Media Lab

Southern California Institute of Architecture
Bachelor of Architecture · 2023
Los Angeles, CA · 2017–2023

- GPA: 3.78/4.0

SKILLS

- **Product design:** Interaction design, user flows, journey mapping, competitive analysis, wireframing, usability testing
- **Design and prototyping:** Figma, FigJam, Adobe Creative Suite, high-fidelity prototyping, Claude Code, Codex
- **Programming and data:** Python, SQL, pandas, HTML/CSS, data visualization
- **3D and visualization:** Rhino, Blender, V-Ray, D5, Unity, Unreal Engine

SELECTED RECOGNITION

- **Flow Chair** — Silver, NY Product Design Awards, 2024
- **Tender Towers** — Gold, London Design Awards, 2025
- **Arcade.dia** — Gold, MUSE Design Awards, 2025
